</br>
</br>
</br>
</br>

  <div class="indent">I am a current Film Studies Major student at Concordia, and I am
  writing to express my strong interest in the Specialization in the
  Computation Arts program. As much as I enjoy the study of moving pictures, I am more
  passionate about creating digital media. Thus,
  I am determined and motivated to pursue a career as a 3D artist. </div>
</br>
</br>
  <div class="indent">
```

I have over 10 years of technical drawing experience from taking art classes at Atelier de Brésoles, La Palette Art School, and animating art programs at an elementary level which is my current job. However, my interest in digital art grew as of the beginning of the pandemic, where I began to learn 3D modeling and experiment with animation using Blender. Once having grasped an understanding of the software, I developed a great passion for creating 3D models. With my digital artwork improving, Nu Age Films, a music video production company, offered me an internship where I assisted to model digital assets called NFTs for the American rapper Ice-T. This project further taught me about Blender's tools but also about collaboration. As a young artist, my artworks have been created solely by myself, so I was pleased to experience the interchanging of ideas/constructive criticism, and help brought on by this project. I was then assigned another project where I was to edit the behind the scenes footage for Senior's Sun Girl music video. Having taken a film production course in college, I already had basic knowledge using Adobe Premiere Pro to edit short films. Throughout this opportunity, my 3D modeling and editing capability grew, and I experienced working on a project with another artist.

Another project I was and still am devoted to, is a humanitarian trip to Armenia this summer with my scouting group at AGBU Montreal Scouts. With a goal of raising \$58,000 for our team to build an art studio for young Armenian kids affected by the border crisis between Armenia and Azerbaijan. In order to pay for our trip and the materials we will be providing, I hosted one of our fundraising events which taught me about the hardships of leadership.

My career goal led me to find the Specialization in the Computation Arts program at Concordia. After my first year in Film Studies, it had been too late for me to apply for an internal transfer so I spent this year continuing to learn Blender while improving my portfolio to fit this program's requirements. However, I did not believe my technical drawings and 3D models were enough to make my portfolio stand out, as I had no programming knowledge. Therefore, I signed up for an online coding course on SheCodes, which taught me enough HTML, CSS, and JavaScript for me to code my own interactive website. I am a motivated artist, determined to get into the Computation Arts program as it

will equip me for my desired career path. I am mostly interested in 3D modeling but I am open to expanding my knowledge on multimedia, digital arts, visual effects, and graphic design, whilst also developing proficiency in programming.

</br>

</br>

I look forward to hearing from you in the near future.

</br>

<h2>3D Models</h2>

<div class="work-list">

<div class="work">

<div class="layer">

<h3>Alyssa #3</h3>

<p>An advertisement of my personal brand I 3D modeled using blender. I used the surrounding environment

to tell as much about the product without using words whilst designing the overall image to be visually

appealing. The fruity scent of the perfume is told by the peaches on the right, and it's freshness by

the cut fruit and beach in the background. </p>

</div>

</div>

<div class="work">

<div class="layer">

```

    <h3>Ice T</h3>
    <p>Using Blender, I collaborated with Nu Age Films, a music video
production company, to model an Ice-T glass filled with iced tea, during my
    internship. My main contributions were sculpting the rapper's face onto
the glass, texturing the facial
    hair and the orange slice. This 3D model was requested to be made by the
rapper Ice-T, to later be held
    as an NFT (Non-Fungible Token). </p>
    </div>
  </div>
</div>
<div class="work-list">
  <div class="work">
    
    <div class="layer">
      <h3>Early Trip to Work</h3>
      <p>I modeled a low poly world in Blender, an environment design possible
for a game. By adding in a car, I added
        life and set the mood with the warm sunlight hinting at dawn or a sunset.
</p>
    </div>

<h2>Drawings</h2>
<div class="work-list">
  <div class="work">

```

```

    
    <div class="layer">
        <h3>Self Portrait</h3>
        <p>A pencil drawing I did of myself, not only to practice capturing
facial features but to also record myself in that given time. By having drawn
        my self-portrait, I have a time stamp of my appearance and artistic
capability of when I completed this artwork. </p>
    </div>
</div>
<div class="work">
    
    <div class="layer">
        <h3>Final Smile</h3>
        <p>A still life drawing of a skull using charcoal on grey paper. Having
covered the paper in black first, I erased where the skull was reflecting light.
        This technique pushed me to approach this light study backwards,
comparing to what I am used to with a pencil and paper
    </p>
    </div>
</div>
</div>
<div class="work-list">
    <div class="work">
        
        <div class="layer">
            <h3>Rodeo Cruelty</h3>
            <p>This pastel and colouring pencil drawing is my earliest artwork.
Having been disgusted by this cruel sport, I aimed to capture the
            aggressive behaviour shown towards animals, such as horses and bulls.
        </p>
    </div>
</div>
<div class="work">
    
    <div class="layer">
        <h3>The Egg</h3>
        <p>This still-life drawing was made with white pastel and pencil on grey
paper. Focusing this light study drawing not only on the direct light
            hitting the egg, but also the light reflecting off the table. Allowing
the viewer to appreciate the subtle details of such a subtle object. </p>
    </div>
</div>
